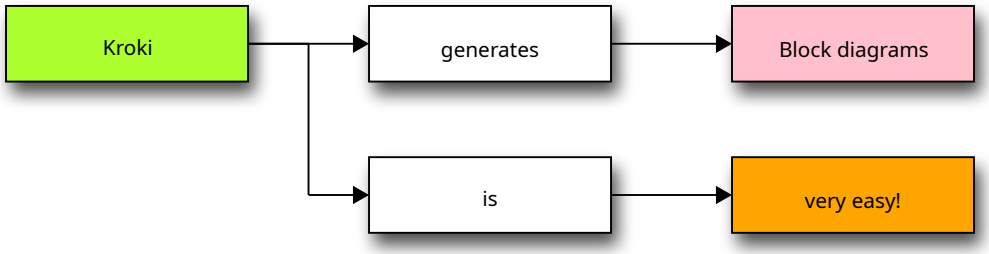
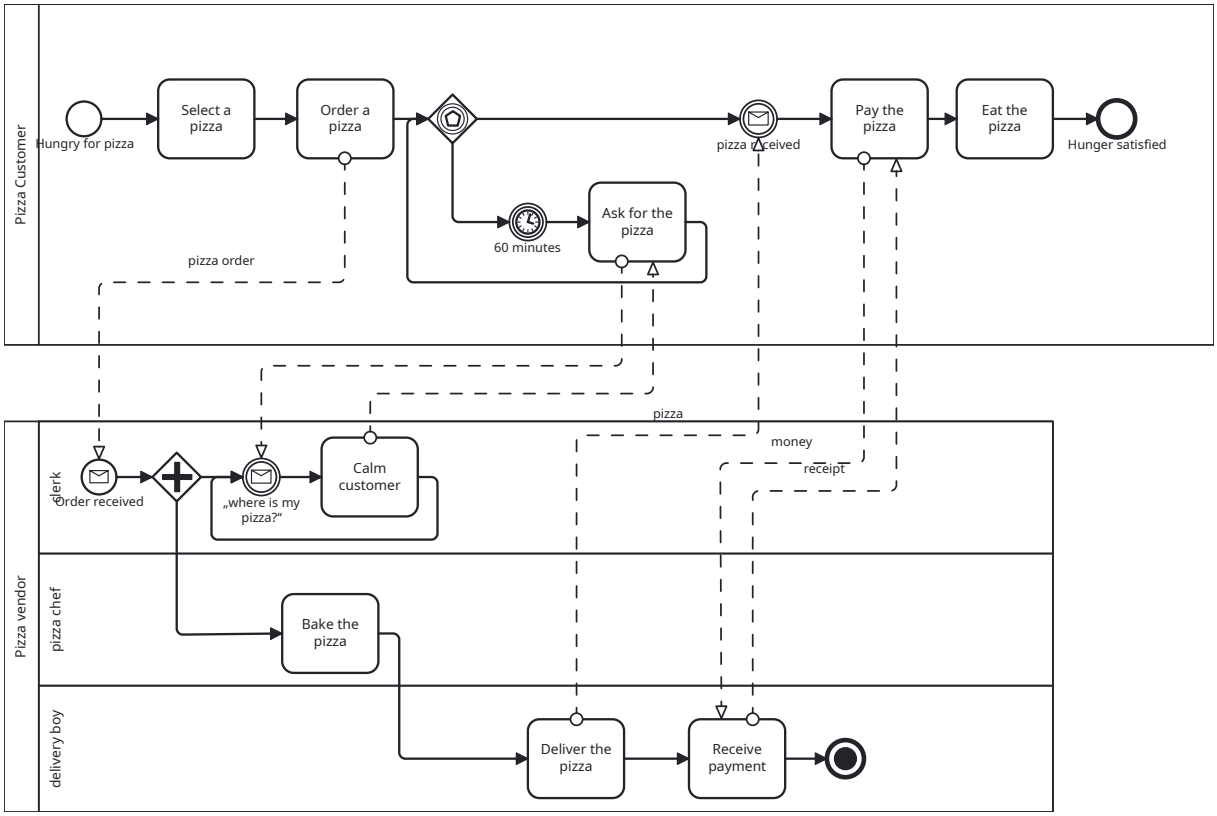
Kroki Support!

BlockDiag



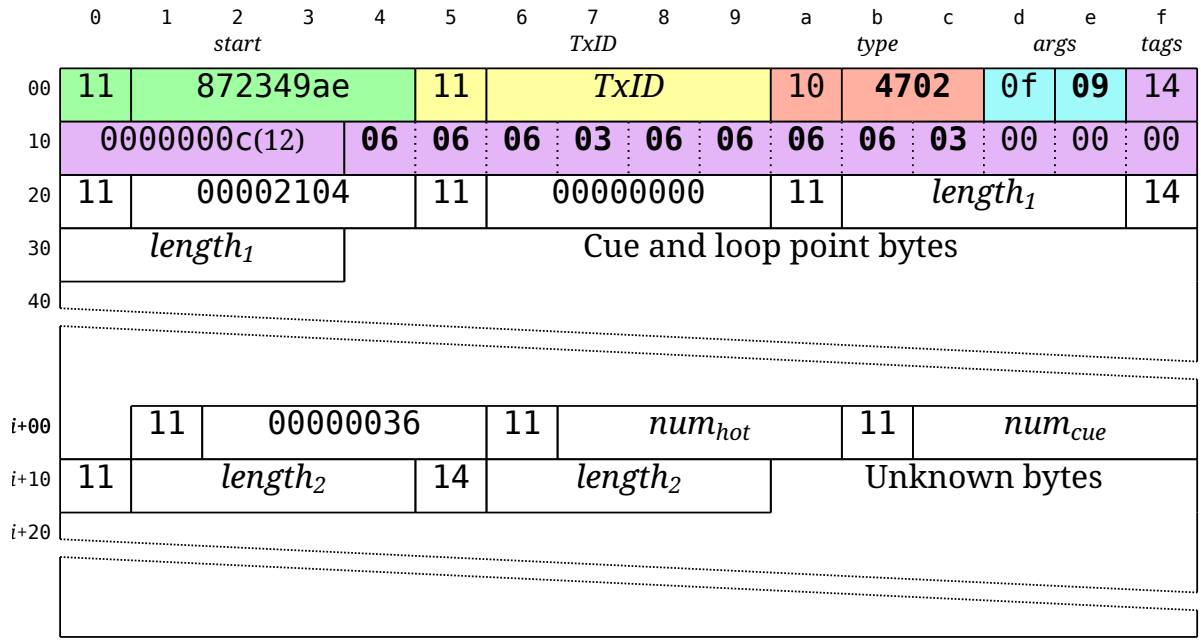
Details see BlockDiag

BPMN



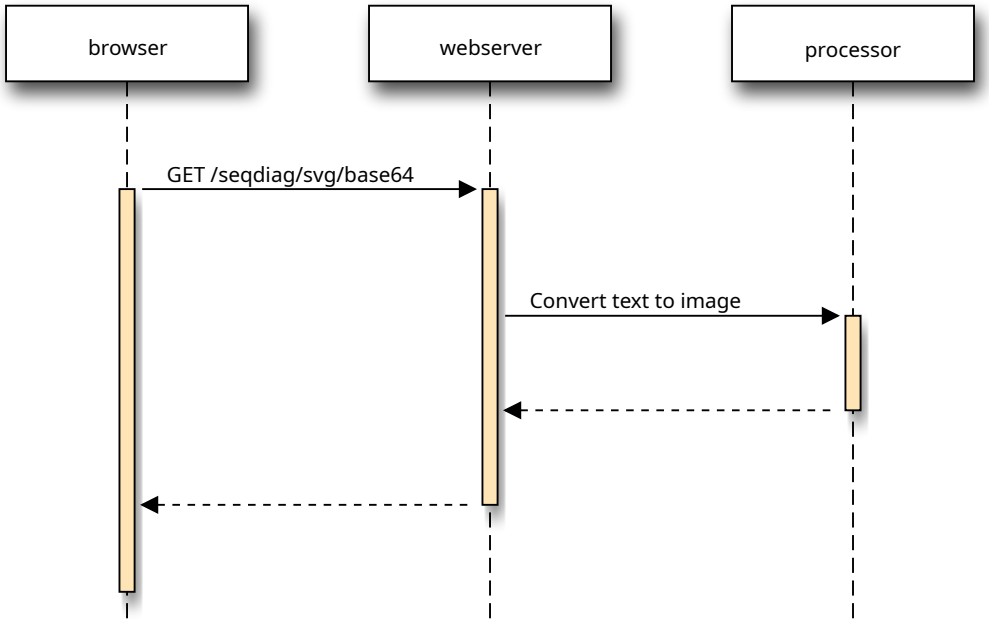
Details see BPMN

Bytefield



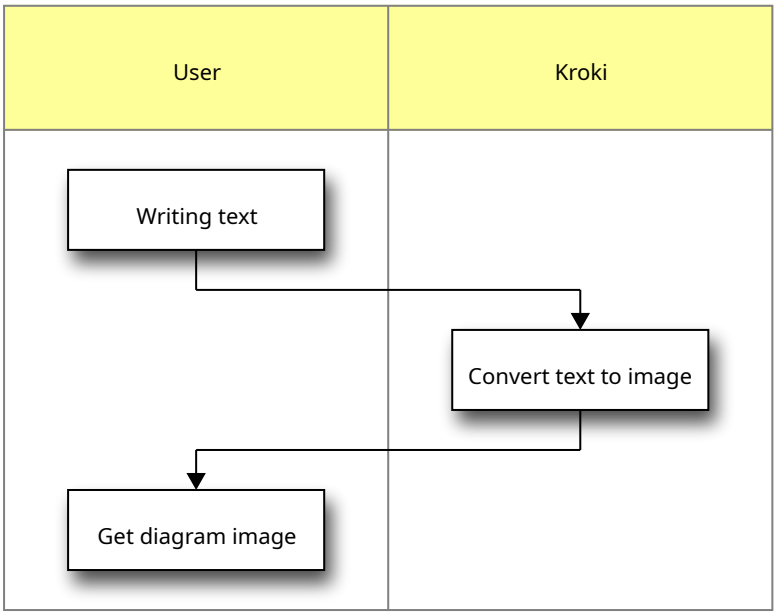
Details see Bytefield

SeqDiag



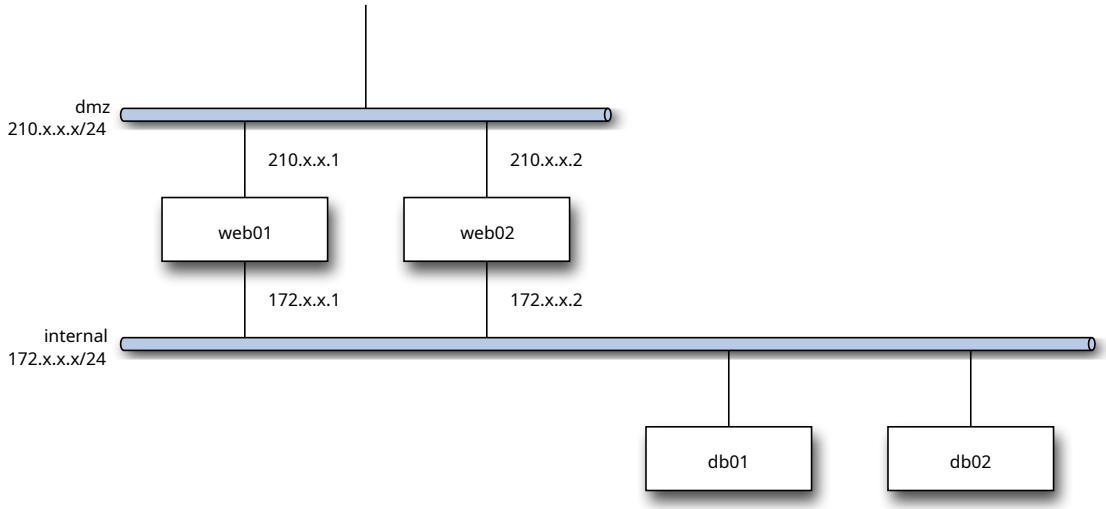
Details see SeqDiag

ActDiag



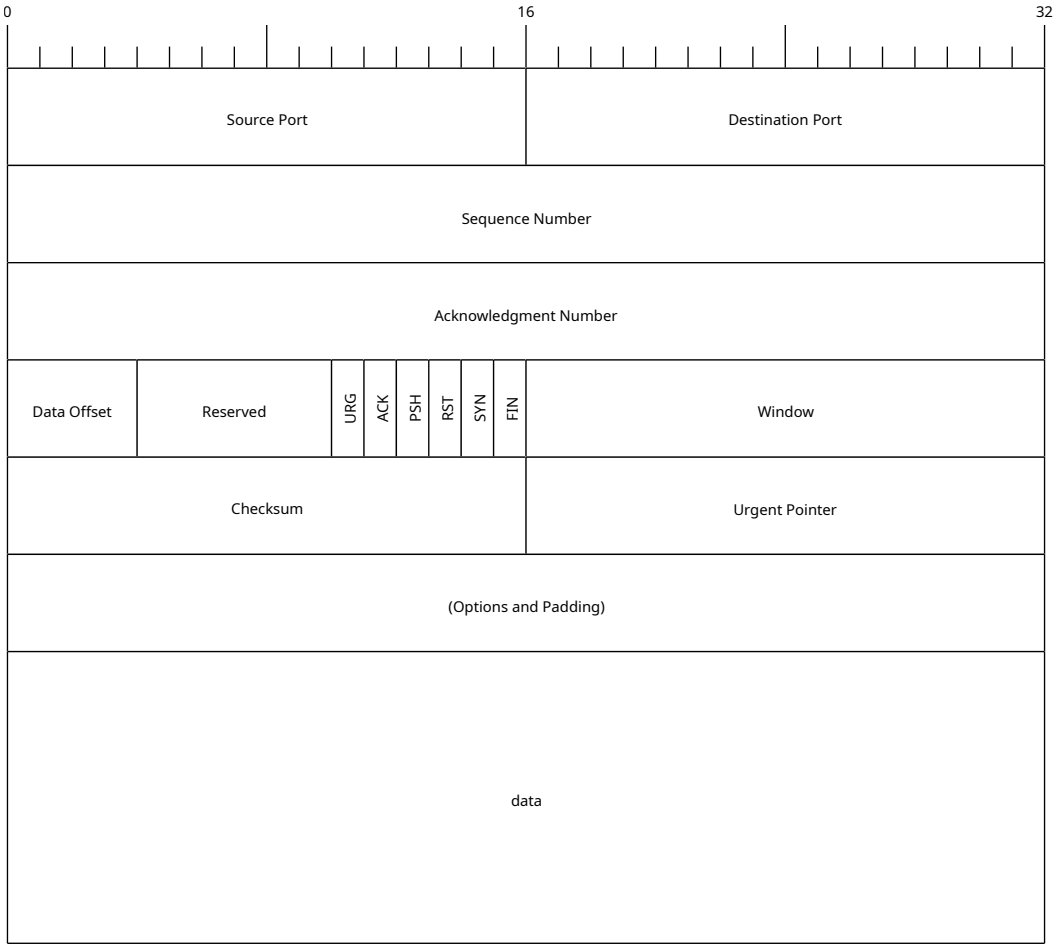
Details see ActDiag

NwDiag



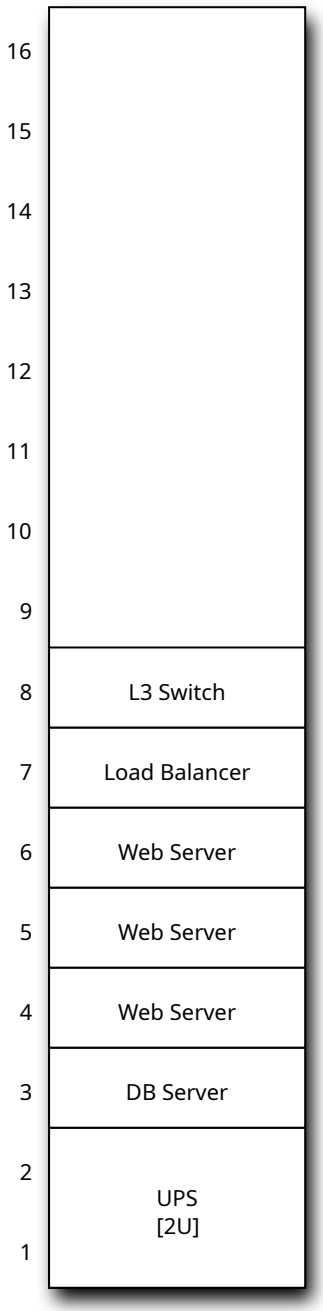
Details see NwDiag

PacketDiag



Details see PacketDiag

RackDiag

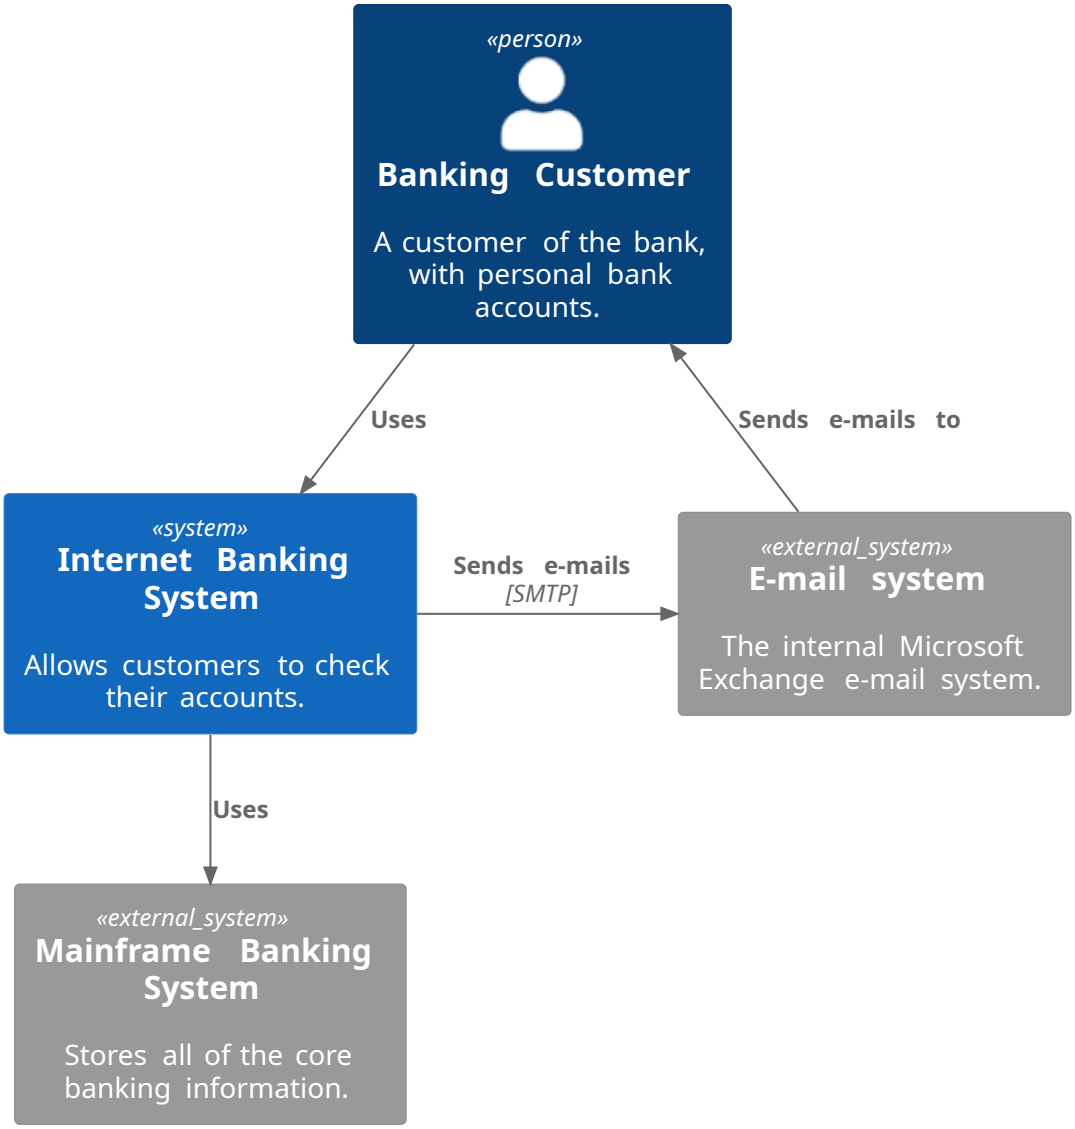


Details see RackDiag

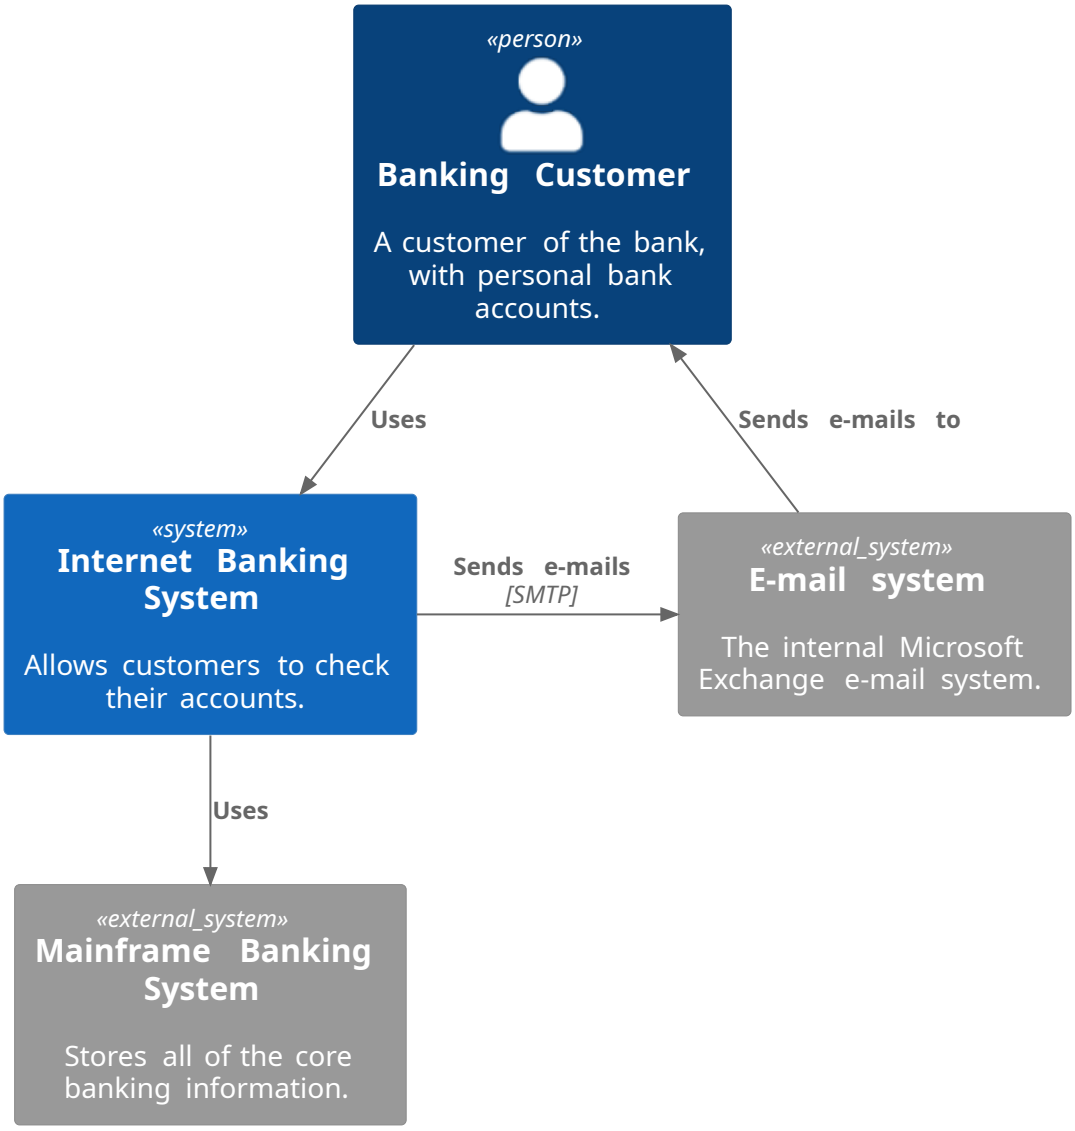
C4 with PlantUML

You can use the proper kroki type `c4plantuml`, *or* the alias `c4`:

System Context diagram for Internet Banking System

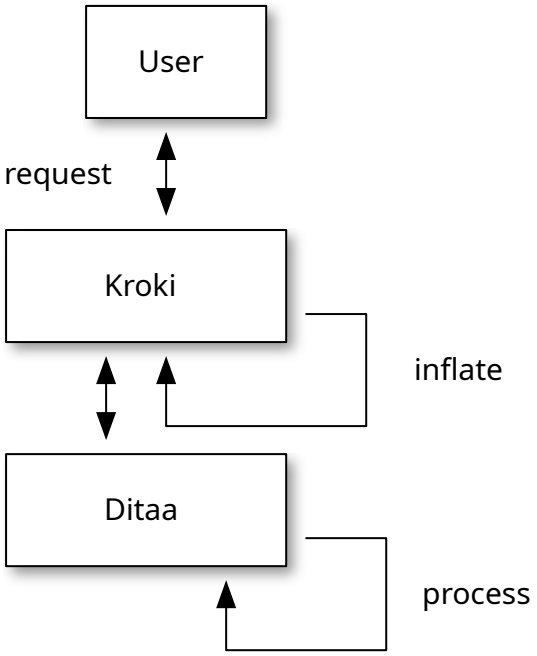


System Context diagram for Internet Banking System



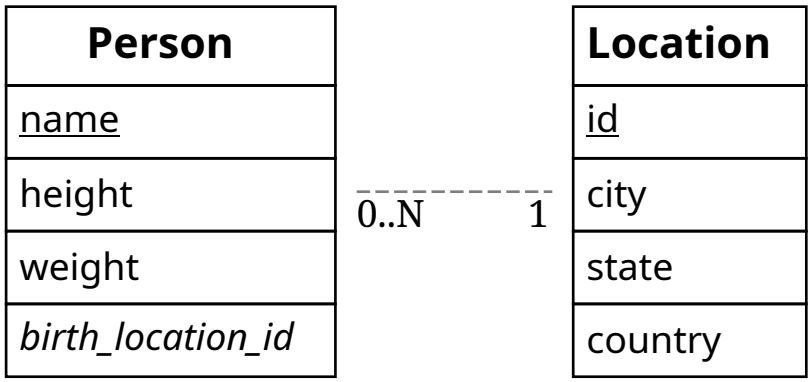
Details see C4 with PlantUML

Ditaa



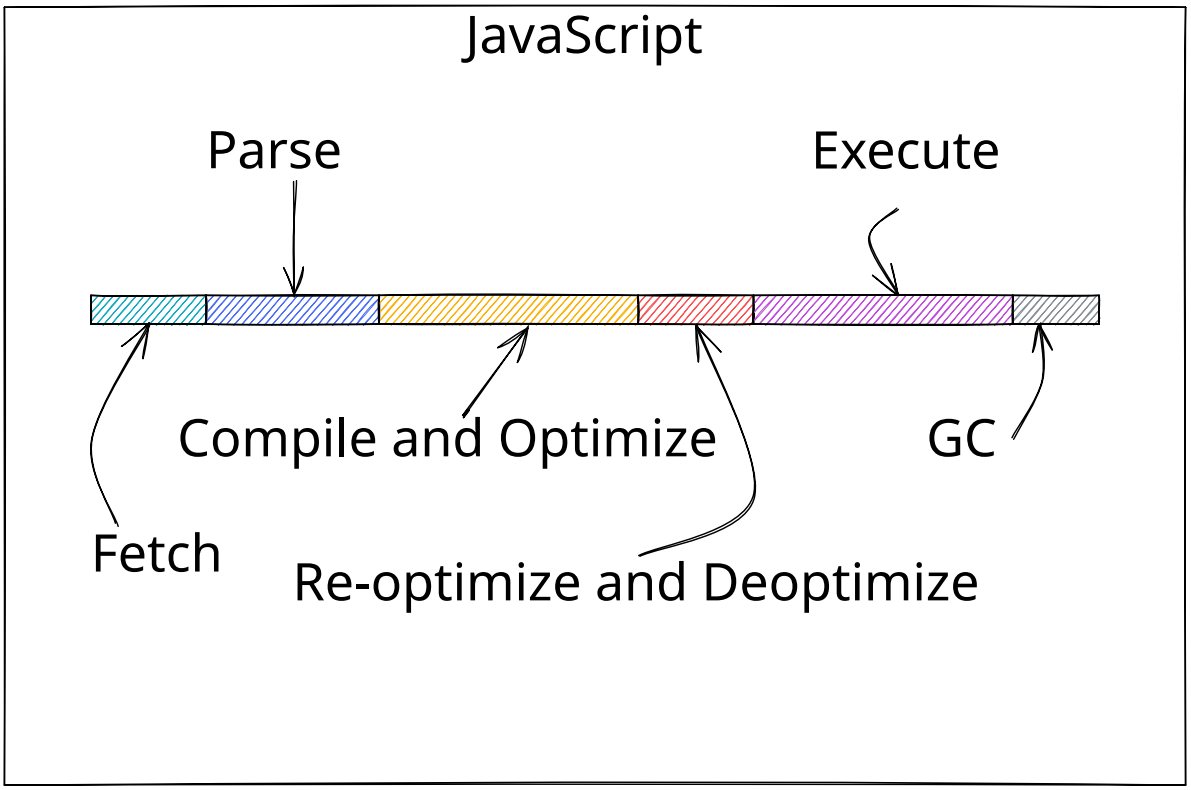
Details see Ditaa

ERD



Details see ERD

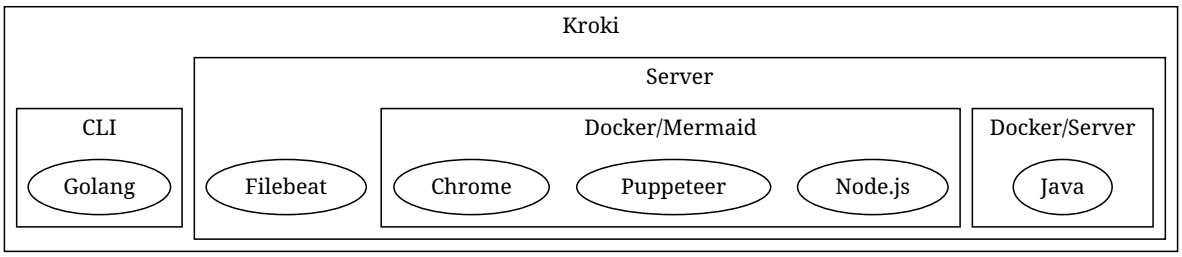
Excalidraw

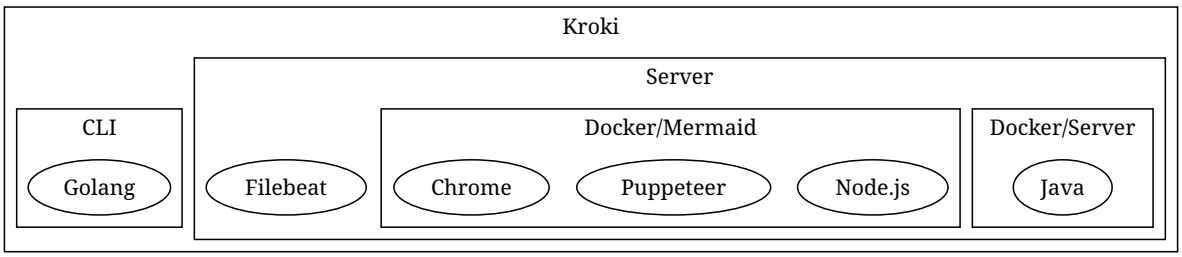


Details see Excalidraw

GraphViz

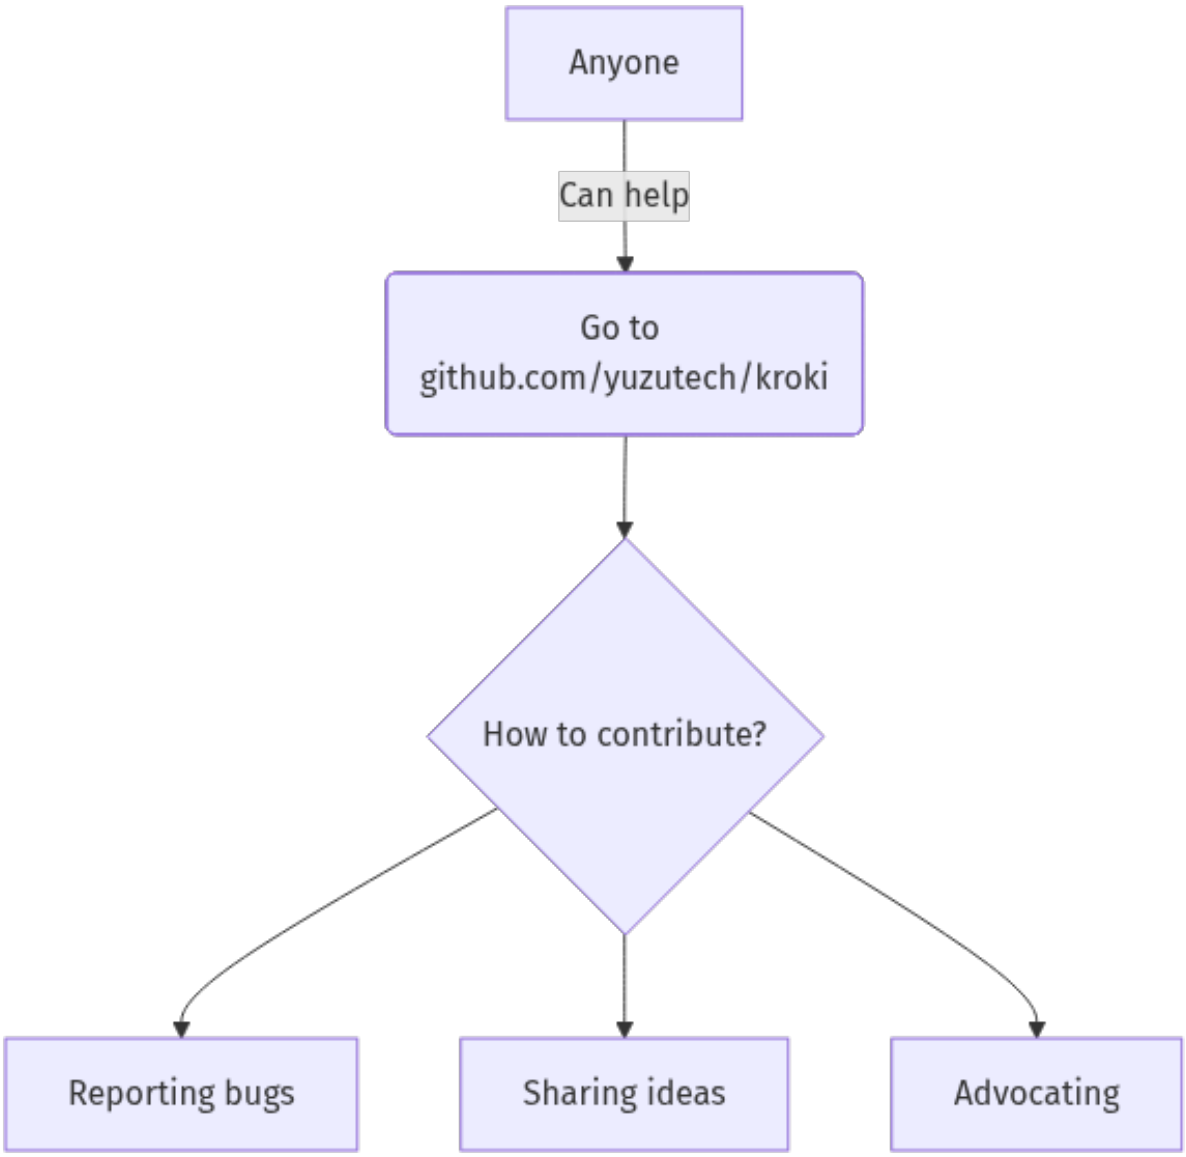
You can use the proper kroki type `graphviz`, or the alias `dot`:





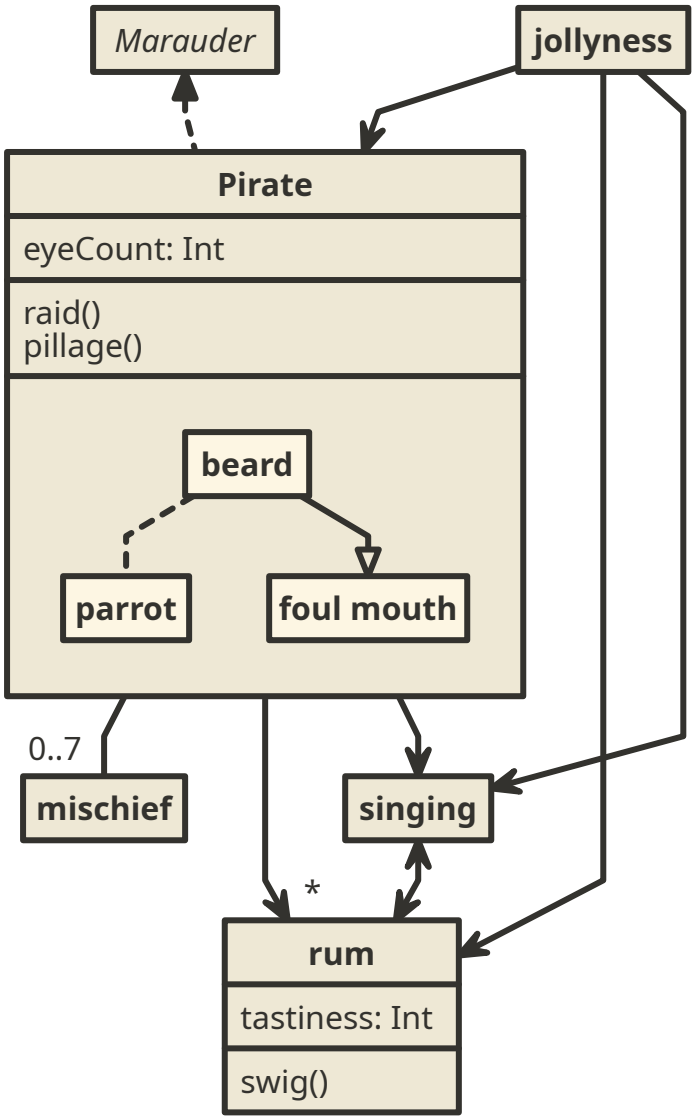
Details see GraphViz

Mermaid



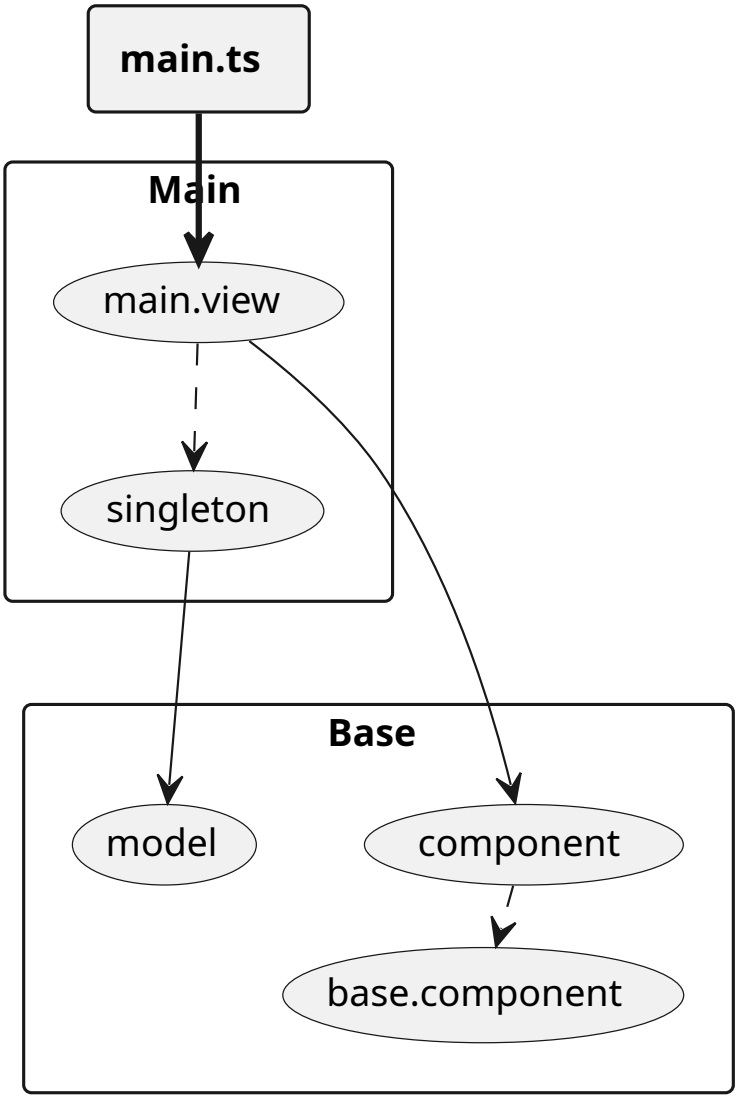
Details see Mermaid

Nomnoml



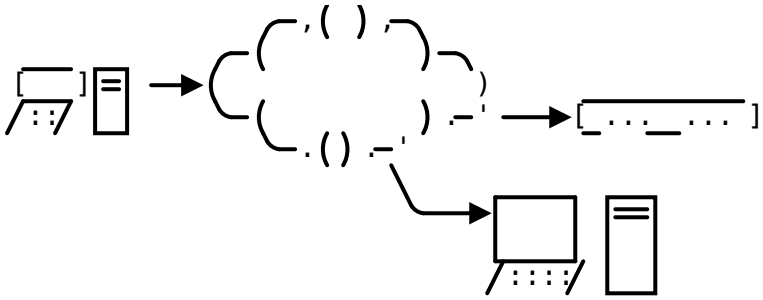
Details see Nomnoml

PlantUML



Details see PlantUML

Svgbob



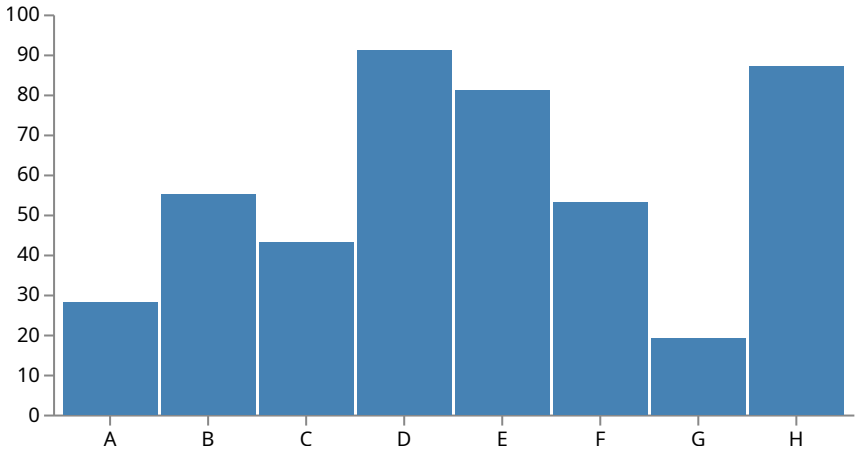
Details see Svgbob

UMlet

Not supported

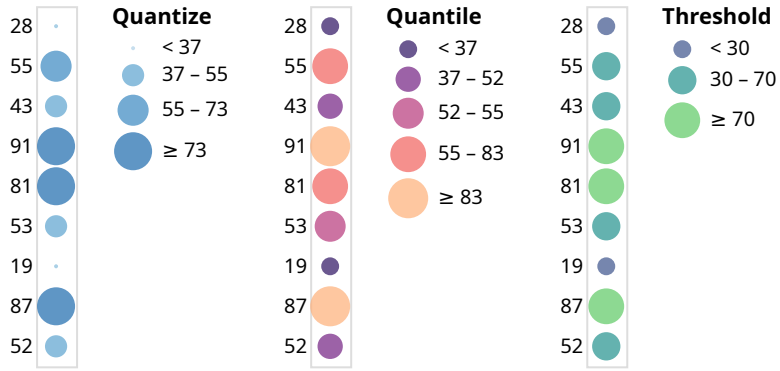
Details see UMlet

Vega



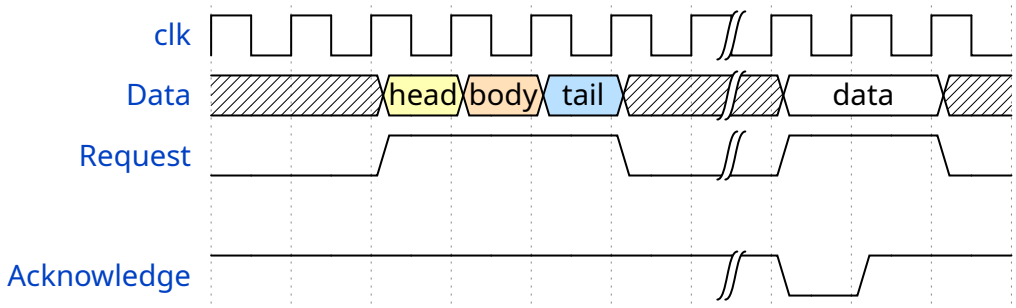
Details see Vega

Vega-Lite



Details see Vega-Lite

WaveDrom



Details see WaveDrom
